Waterstones

Bench stone – medium/1000grit 210 x 70 x 20mm £21.95

Bench stone – fine/4000grit 210 x 70 x 22mm £34.50

Waterstones are man-made from very sharp particles fused together in a friable bond. This allows new sharp abrasive particles to be constantly exposed and explains the very fast cutting action. From time to time they will need to be levelled and dressed using a fairly coarse abrasive paper glued to a flat surface. Only water should be used as a lubricant.
